It does not include any on site labor costs for diagnosis, replacement and reprogramming of the defective equipment. Additional equipment may be added during the warranty period to be coterminous with the original warranty term. This coverage may only be cancelled within 30 days of the original activation date. Covered Products:

Percent of Manufacturer List Price

Toshiba does not publish a List Price for this coverage. The pricing is derived by determining the list prices of the eligible individual (not package) items to be covered. The list price is then multiplied by 3.0% for 61 month coverage and 3.5% for 84 month coverage. Copper State Communications then offers this plan at 95% of above pricing.
